

Purpose-Built for Rural Healthcare

Rural hospitals are being asked to care for increasingly complex patients with limited staff and resources. CorVent Medical is US owned and operated and helps rural providers keep the delivery of care local by reducing complexity, extending clinical expertise, and enabling confident respiratory care in any setting. Our Simple, Safe, Smart™ approach strengthens rural health systems without adding operational burden, so patients can be treated close to home.

Simplified Critical-Care Ventilation

RESPOND® Ventilator

Designed for rural hospitals and critical access facilities:

- Simple and intuitive to use
- Zero maintenance requirements
- Invasive & Non-Invasive Ventilation
- Enables care delivery without patient transfers
- Strengthens local healthcare system resilience

VALUE TO RURAL FACILITIES:

Deliver advanced respiratory care with confidence without increasing staffing, lengthy training programs, or the heavy maintenance burden of traditional ICU ventilators.

Remote Monitoring Designed to Support Care Teams

CorVision™ Remote Patient Monitoring

Clinical visibility beyond the bedside powered by informational software that extends specialist oversight, integrates telehealth and remote patient monitoring, and improves workforce efficiency.

- Reliable ventilatory support ensures high-quality care close to home
- Customizable views and reporting for scalable access in any clinical setting
- Intuitive devices, streamlined workflows and access to patient respiratory data

**Monitoring software supports clinicians but does not replace clinical judgment

**This product has not been approved or cleared for sale in the US by the FDA

VALUE TO RURAL FACILITIES:

Extend access to respiratory care across your facility without adding staff.

Workforce Efficiency & Emergency Preparedness

Designed to support rural teams every day-and when it matters most.

- Intuitive technology reduces cognitive load and training time
- Supports routine respiratory care and surge scenarios alike
- Scalable for respiratory emergencies, seasonal demand, or public health events
- U.S.-based, FDA-compliant manufacturing with proven production scalability

VALUE TO RURAL FACILITIES:

A dependable respiratory platform that performs in both everyday care and crisis situations.

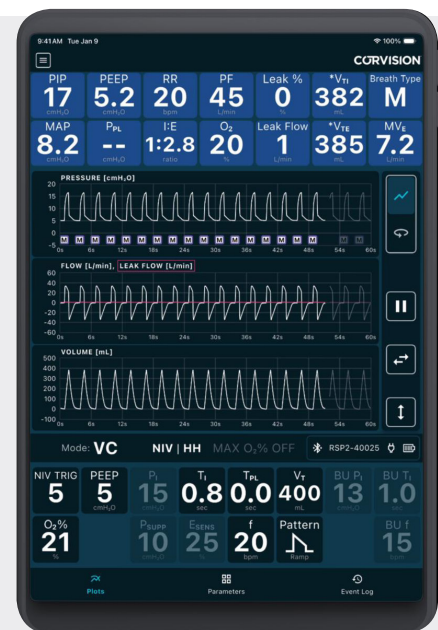

Measurable Impact for Rural Health Systems

CorVent technology supports tangible improvements in both clinical and operational performance:

- Enables reductions in ICU transfers and unnecessary care escalations
- Contributes to improved outcomes for patients with respiratory conditions
- Helps reduce readmissions among high-risk respiratory patients
- May contribute to cost efficiencies when care is delivered locally

VALUE TO RURAL FACILITIES:

Better outcomes for patients, less strain on staff, and stronger financial sustainability while quickly and easily showing strong ROI.

* Software designed to support clinicians and does not replace clinical judgment

Helping rural hospitals deliver advanced respiratory care - close to home.
